

Nuvolo Connected Workplace for Life Sciences SMB

Our Connected Workplace for SMB (small to mid-sized business) solution offers you a leading facilities and maintenance management platform that is easy to implement as you get up and running.

This pre-configured offering is not only easy to implement, it can also scale up to align with your growing business needs. Best of all, it's validated (IQ and OQ, with PQ* support), so your organization has one less thing to worry about.

Key Benefits

Fast Implementation

Get up and running in as little as 4 weeks. Our customer success team is on-hand to help with this process.

Core Product Functionality

Use the same capabilities offered in our enterprise Connected Workplace for Life Sciences solution.

Easy Set Up

The solution is easy to set up, needing only minimal modifications and configuration before you get started.

Ability to Scale

Tailor your solution to match the evolving needs of your organization.

GxP and Non-GxP Asset Management

Maintenance

Space and Reservations

Calibration

With Connected Workplace for SMB, you can build a dynamic, validated maintenance solution that scales to meet your changing business goals.

**PQ to be completed and available in Q2 2022.*
