

Nuvolo Connected Workplace for SMB

Our Connected Workplace for SMB (small to mid-sized business) solution offers you a leading facilities management platform that is economical and easy to get up and running.

This offering is not only easy to implement, but it can also scale up to align with your growing business needs.

Key Benefits

Fast Implementation

Get up and running in as little as four weeks. Our customer success team is on-hand to help with this process.

Core Product Functionality

Use the maintenance capabilities offered in our more robust enterprise Connected Workplace solution.

Easy Set Up

The solution is easy to set up, needing only minimal modifications and configuration before you get started.

Automatic Software Upgrades

You automatically receive software upgrades and are always using the latest version of the platform.

Ability to Scale

Tailor your solution to match the evolving needs of your organization.

Solution Highlights

This solution offers:

- Robust enterprise asset management capabilities
- Repair work order ticketing and work order management
- User-friendly preventative maintenance planning
- Parts and warehouse procurement functionality
- A mobile application for technicians in the field
- Vendor management capabilities

With Connected Workplace for SMB, you can build a dynamic maintenance solution that scales to meet your changing business goals.
