

# Connected Workplace for Small to Mid-Sized Hospitals

Our Connected Workplace solution for smaller healthcare clients offers a leading clinical enterprise asset and facilities management platform that is economical and easy to implement.

This offering is not only easy to get started with, but as your organization grows, it can scale up to align with your changing business needs.

## Key Benefits

### Fast Implementation

Get up and running in as little as four weeks. Our customer success team is on-hand to help with this process.

### Automatic Software Upgrades

You automatically receive software upgrades and are always using the latest version of the platform.

### Easy Set Up

The solution is easy to set up, needing only minimal modifications and configuration before you get started.

### Ability to Scale

Tailor your solution to match the evolving needs of your organization.

## Solution Highlights

### This solution offers:

- Robust enterprise asset management capabilities
- Work order ticketing and management
- User-friendly planned maintenance
- Parts and warehouse procurement functionality
- A mobile application for technicians in the field
- Vendor management capabilities

With Connected Workplace for SMB, you can build a dynamic CMMS and facilities maintenance solution that scales to meet your changing business goals
