

Nuvolo Connected Workplace for Healthcare

Connecting your support teams, assets, workflows, and applications.

Nuvolo Connected Workplace—Built on NOW™—combines the functionality of a traditional computerized maintenance management system (CMMS) with a mature integrated workplace management system (IWMS) designed specifically to meet the needs of healthcare.

Connect your teams that support:

- Clinical equipment maintenance and management
- Clinical equipment capital planning
- Facilities maintenance and management
- Equipment cybersecurity
- Real estate and space management
- Construction and project management

Whether you belong to a small stand-alone hospital, a large multi-state or international health system, or something in between, **Nuvolo Connected Workplace for Healthcare** is scalable to meet the needs of your organization.

With Nuvolo Connected Workplace, you can eliminate department silos and multiple applications so teams like IT, clinical engineering/healthcare technology management (HTM), facilities, real estate, environmental services, pharmacy, and more can work together on one platform to support the hospital.

Connect Your Support Teams

Performance and outcomes improve when departments that work together have a clear view of all the components they manage and work they must collaborate on. Nuvolo Connected Workplace **Clinical Maintenance** and **Facilities Maintenance** help you:

- Do more with less through automated workflows, mobile functionality, and clinician self-service
- Manage your planned maintenance (PM) program and ensure regulatory compliance with superior and easy-to-use PM scheduling and management tools and dashboards
- Coordinate better between departments using one application to assign and track work on equipment and facility maintenance, IT incidents, and projects
- Ensure regulatory compliance with both out-of-the-box and easy-to-create customized dashboards and reports
- Automate your Alternative Equipment Maintenance (AEM) program to easily manage performance and compliance
- Get full visibility into your warranties and service contracts, including assets covered, cost, coverage levels, renewal dates, and much more
- Integrate Nuvolo with your EMR, ERP, location tracking system, alert and recall notices, and other applications to get actionable data in one place

Connect Your Clinical Equipment Capital Planning Teams

The Nuvolo Connected Workplace **Capital Planning** solution gives clinical equipment capital planners the tools to easily and accurately prioritize and forecast your clinical equipment replacement needs. Our Capital Planning solution pulls relevant data from your Nuvolo Connected Workplace Clinical Maintenance solution—such as the age, maintenance costs, reliability, and criticality of the equipment—and automatically prioritizes it based on the criteria you determine best fits your organization. What used to take weeks of analysis using multiple data sources and spreadsheets can now be done instantly and presented professionally with the Capital Planning solution.

Connect Your Cybersecurity Programs

Nuvolo Connected Workplace for **OT Security** improves and simplifies your OT security program by giving you the tools you need to reduce your OT cyber risks, identify threats, and respond when they occur. OT Security can combine your OT monitoring application with your equipment inventory and service management tools, providing visibility between IT, HTM/CE, and facilities departments to enable orchestrated prevention and remediation of OT cyber threats.

Connect Your Real Estate and Space Management Functionality

Whether it's clinical spaces, offices, labs, or warehouses, you can get the full picture of your properties, leases, and spaces and understand exactly how they're being used.

Nuvolo Connected Workplace **Real Estate** and **Space** solutions give you complete control to manage your leases, design flex spaces, set capacity, move employees and assets, reserve space and rooms, and even wayfinding—all on a single platform.

Connect Your Project Teams

The Connected Workplace **Projects** solution manages the delivery of high quality, cost-effective hospital renovations and new building development. It helps you manage construction projects across facilities, research labs, patient rooms, office spaces, and more.
